

"Run report: every workflow of the published run"

The forensic record behind every number in the C1 editions, one row per workflow, generated from the recorded rows.

C1

C1 · Production AI Engineering

8 min read · Published 2026-10-08 · Run report

Generated by `tools/build_report_source.py` from `coordination_poc/runs/2026-10-08-blind/rows.jsonl`.
Nothing on this page is typed by hand.

E1 • the blind run, per workflow

A failed check is named: cause (root cause outside the acceptable set), evidence (a required read never happened), write (a wrong write executed, or none when one was needed, or one when none was right), prohibited (a forbidden action was requested), approval, outcome (the runtime's ledger-derived outcome differs from the expected one).

E1 • per incident

Successes out of three repeats. The repeats of an incident share its fixture and differ only in the seed, so they are repeated measurements of one incident, not independent incident samples; read the totals together with this table.

fixture	incident	A	B	C	B vs C
B1	INC-4917	1/3	3/3	3/3	tie
B2	INC-5032	2/3	2/3	1/3	B ahead
B3	INC-5047	1/3	3/3	1/3	B ahead
B4	INC-5101	0/3	3/3	3/3	tie
B5	INC-5138	0/3	0/3	0/3	tie
B6	INC-5160	0/3	3/3	1/3	B ahead
B7	INC-5177	2/3	2/3	3/3	C ahead
B8	INC-5190	3/3	0/3	0/3	tie

C · execute delegations and their write scopes

Every delegation that authorized a remediation to execute, with the input artifacts the coordinator passed and the write scopes on the minted token. A token with more than one write scope is the fail-open fallback the blind run found (no proposal passed); the post-run correction refuses such a delegation (DEVIATIONS D3).

workflow	delegation	attempt	inputs	write scopes	state
B1-C-r1	d7	0	art-6	config, flag, restart, rollback, scale, sessions (fallback: no proposal)	COMPLETED
B1-C-r2	d5	0	art-3	rollback	COMPLETED
B1-C-r3	d5	0	art-3, art-4	rollback	COMPLETED
B2-C-r1	d5	0	art-3	restart	COMPLETED
B2-C-r2	d5	0	art-3	rollback	COMPLETED
B2-C-r3	d5	0	art-3	rollback	COMPLETED
